

AP Economics 2019 - 2020 Fall Semester

Essay #1: Marginal Cost and Marginal Benefit of Higher Education, and Student Loan Forgiveness

Mr. Mace

Due: 13 Dec 2019 Full Credit

Framework(Context): Higher education is getting more expensive every year, far outpacing the rise in wages. Is going to college worth it? As college gets more expensive every year, and with wages being stagnant, is it worth it to go to college? Will college loans bury you? Should we pursue student loan forgiveness? Would this make education more available, or would the cost be untenable? What kind of job can you get with a degree and without a degree? Does college work equally well for everyone who goes? Are all colleges going to give good degrees? Why are certain colleges 'better' than others? Is this the right course for you? What would you advise others?

Main Question: Are the marginal benefits of college worth the marginal costs, and would having student loan forgiveness be an answer to high college costs? Explain your answer with respect to yourself, to others, and to society.

Sample Outline:

1. Essay Opening: Marginal Cost and Marginal Benefit of Higher Education, and Student Loan Forgiveness
 - a. Opening paragraph (Anecdote, Quote, Poem, Data, something to get the reader's attention)
 - b. Thesis (Remember to underline thesis)
